

NOTICE TO RESIDENTS

INSTALLING CATHODIC PROTECTION ON WATER SERVICES

Please be advised that CUI's contractors will be installing cathodic protection on approximately 200 water services in your neighborhood from **August 13 to September 14, 2018**.

Cathodic protection is a preventative measure to extend the life of a copper water service. Sacrificial anodes will be installed on the public side of the water service connection. An anode is a piece of metal which is intended to attract corrosion instead of the copper pipe. It is anticipated installation of the anodes may extend the useful life of the copper service system components by up to 20 years.

What This Means For You

Depending on the configuration of your property, the water service will be accessed by making a hole in the asphalt, your lawn, sidewalk, or driveway. The sacrificial anode will be installed and the hole backfilled. All repairs to lawns, sidewalks, driveways, and asphalt will be completed within one week, weather-permitting.

This activity is not expected to disrupt your water service.

CUI's contractors will be working from approximately 8:00 am to 5:00 pm, Monday through Friday.

No Parking signs will be posted the evening before, in areas where crews will be working the following day. For your safety and those around you, please obey all signage.

Thank you for your support as we work to improve the reliability and integrity of Chestermere's water system.

Contact Us

We value your business and take pride in our customer service. Our customer service team is ready to assist you! If you have any questions or concerns, please contact our office at 403-207-7284 or email us at myaccount@cuinc.ca. or go to cuinc.ca/services/water/copper-water-services
